ELECTRICAL ENGINEERING, MEASUREMENT AND CONTROL TECHNOLOGY, AUTOMATION

Control cabinets

We develop control cabinet layouts customized to your specific needs for equipment and control cabinets, and also for low-voltage distribution panels, including in ATEX zones.

The deployed distribution panels are specified in accordance with the specifications in IEC 61439. We ensure that ATEX and non-ATEX equipment is rigorously segregated. In addition to the circuit diagrams, we also prepare detailed fabrication documents for building the control cabinet.

For each control cabinet, we give you the type and BOM certification, the testing documentation, and the CE marking pursuant to the low-voltage directive.
