

Future-proof plant planning & erection

ELECTRICAL ENGINEERING, MEASUREMENT AND CONTROL TECHNOLOGY, AUTOMATION

Process analysis equipment

Our experienced team designs and analysis equipment for ensuring the quality of your products, plant safety, and for occupational and health safety & environmental protection

We assist you with our extensive know-how for a wide range of analysis equipment. We make our expertise and experience available to you for project planning, assembly, maintenance, and repair of your process analysis equipment. Potential applications for process analysis equipment include e.g. ambient air monitoring and UEG monitoring, but also emission, conductivity, and customized concentration measurements.

Our services:

- Consult on and develop metrology, monitoring, and automation concepts
- Conceptual design of complete metrology equipment, including the required infrastructure (ATEX/ toxin protection, air-conditioning, air supply, etc.)
- Prepare technical tender documentation
- Conceptual design for analysis equipment rooms iaw. EN 61285
- Procure, assemble to industry standards, and commissioning
- Conduct audits during erection
- Hands-on training for operating, maintaining, and servicing the equipment
