

ENVIRONMENTAL CONSULTING AND PERMANENT MANAGEMENT

Permit management

If we are involved in the planning process at an early stage, we can support you with practical tips to help you avoid unnecessary costs while implementing your project. We accompany you from the idea to the permit process, and even to the legal validity of your permit approval notice.

When building a (new) plant, answers and solutions need to be found for a wide range of issues. The new plant or plant modification must at all times comply with current laws so that a permit can be obtained for the project.

Our services:

- Personalized consulting regarding the legal framework of your project
- Baseline inspection and clarification of legal permitting requirements
- Consult with respect to statutory requirements for upgrades and/or expansions of your plant
- Prepare and submit permit documentation or declarations
- Dispersion calculation according to TA Luft
- Initial status report for soil and groundwater
- Support pending applications based on varying legal areas
- Organize and support project communication with the public, for review hearings, and meetings with regulators
- Point out alternative solutions
- Mediate permit applications and complaints from neighboring residents
- Legally secure plant documentation and covenant tracking
